① you were first terminated  
from employment because  
of illness

⑤

My dog is a mighty dog because of the extra energy she projects all day long. She is on her guard patrolling our front picture window. She sits on the window sill and watches people & cars go by. Sometimes she even stands straight up on her hind legs and stays up for about a minute or so, so she can get a better view of whatever she is looking at or whoever is passing. And when she sees me come home from work she greets me with a wagging tail and runs around the room for

about 5 minutes; then she turns over and I scratch her belly. She is always so loving as she licks my face.
